**WEST**

**Elite Therapy Center's occupational therapy provides skilled treatment for infants and children who need special help developing or regaining functional skills such as self-care and activity of daily living (ADL) skills, feeding and oral-motor difficulties, play and social skills. We deliver strong encouragement and celebrate in each client's success.**

*we are*

# OPTIMISTIC

**The occupational therapist provides individualized assessment and often early detection of physical challenges. Treatments are play-based and are unique to the developmental level of each child. As with most problems in life, the sooner they are detected and addressed, the higher the success rate. This is especially true for children with special needs. Elite Therapy Center helps children address a functional difficulty before it causes a reduction in executive function, low self-esteem, poor school performance, or strained peer and family relationships.**

## Elite Therapy Center
