Elite Therapy's physical therapy team is dedicated to assisting in early detection of motor development problems and identifying concerns with movement, posture, strength, developmental delays, body position, and functional independence in children from birth to 21 with any degree of impairment.

we are **OPTIMISTIC**

Our PT team helps children in areas with exercise, perceptual training, balance and coordination training, handling techniques, orthotic fitting and training & home programming. Therapy is provided in an atmosphere of FUN and play.

The physical therapist will establish a plan of care and goals through collaboration with doctors, family, and teachers that will help your child to reach their full potential. Early intervention is important in helping to maximize a child's future potential.
