VISUAL & ACADEMIC TRACK

*A specialized program
by Elite Therapy Center
Occupational and
Speech Therapists*

did YOU know?

Our visual and academic track is used to assess and treat the 'underlying causes' of poor attention, learning difficulties, uncontrolled behavior, and ADHD in the classroom and at home.

There is so much **more** to our eyes than just having 20:20

vision. There are **17** visual skills required to complete a reading and writing task and not all are tested at the doctor's office.

The American Optometry Association states that 1-in-4 students have vision problems significant enough to impact their learning.

Our Elite Occupational or Speech therapist will evaluate each child for:

- Retained primitive reflexes
- Visual motor and perceptual development
- Executive functioning skills

SPEECH & Reading Therapy

Elite Therapy Center provides a top therapeutic and holistic approach for reading, intellectual, and academic struggles.

Our licensed and certified Speech therapists hold a Level One Certification for Dyslexia and are able to provide diagnosis and therapeutic plans for visual processing, dyslexia, and other language and reading comprehension.

With a medical based approach, this program can be covered by both private insurance and Medicaid; allowing for opportunities to support accommodations set by your school's curriculum and a great advantage for multiple disciplinary coverage.

Contact us for a Speech or Occupational Therapy evaluation:

254-399-8255 • elitetherapycenter.org

**Our admin team will contact the child's pediatrician or family doctor prior to scheduling.*
